

10	Allowed	9
11	Cancelled	

The comments of Examiner Dr. Whisenant have been reviewed carefully. This amendment is in accordance with Examiner Dr. Whisenant's requirements.

Claim 11 has been cancelled. It is noted that the limitation of Claim 11 are included in the step 1 of the allowed Claim 9.

The following remarks are presented relative to the amendment of the specification and figure 4J.

1. The Examiner correctly indicated that the nucleotide sequence of the gene encoding the NF-kappa B protein submitted by the applicant in computer readable form (the CRF) did not match the sequence that was disclosed in the application. This error occurs on Page 15, and again on Pages 27, 33, and in Figure 4J. Page 33 presents Claim 1 which was cancelled.
2. Upon careful comparison of the nucleotide sequence in the CFR and the sequence disclosed in the original application, the applicant found two inadvertent discrepancies that should be corrected. These discrepancies are as follows:

First inadvertent discrepancy: The location of the relevant sequence occurring in the gene encoding the NF-kappa B protein (disclosed at Page 15 of the original
